

Jinsong Wu requests your support to vote for the position of Vice President Conferences 2026-2027 in the 2025 IEEE Communications Society (ComSoc) Elections.

STATEMENT – Jinsong Wu

Mission: SUSTAINABLE conferences

I have been organizing/steering committee members in more than 45 conferences/workshops/panels financially or technically by IEEE ComSoc/CompuSoc/VTS/System Council). I have been actively involved in IEEE (ComSoc as well as other Societies or organization units) or non-IEEE technical activities such conferences, journal publications, standardizations, IEEE Initiatives, and IEEE technical committees for quite a few years. I have witnessed a number of challenging issues in different ComSoc conferences, such as high registration fees, difficulties in obtaining financial sponsors, and limitations to technical committees and members. If elected, I would work together with other ComSoc members to bravely face and tackle those challenges by

- **S**upporting the analyses and changes of ComSoc conferences and relevant services to provide improved values to ComSoc members, technical committees, and emerging technical committees,
- **S**upporting new conference models to support ComSoc **T**echnic**A**I committees and members,
- **I**ntegrating green technologies and Sustainable practices into the strategic agenda
- promote research and development in emergi**N**g areas to empower ComSoc community with cutting-edge tools and methodologies and encourage collaboration across disciplines and sectors.
- en**A**bling technical committees with more rights in creating IEEE entitled conferences
- try to provide **L**ower and differential conference attendee expenses for different regions or countries
- **E**nhance global collaborations that unite researchers, practitioners, and policymakers worldwide and encouraging industrial participations in ComSoc conferences.

It would be my great honor to humbly serve you while bringing the most values for ALL of you.
