

Acta Geotechnica

Volume 10 · Number 1 · February 2015

RESEARCH PAPERS

Instrumented nanoindentation and 3D mechanistic modeling of a shale at multiple scales

K.C. Bennett · L.A. Berla · W.D. Nix · R.I. Borja 1

Strain localisation and grain breakage in sand under shearing at high mean stress: insights from in situ X-ray tomography

R. Alikarami · E. Andò · M. Gkiousas-Kapnisis · A. Torabi · G. Viggiani 15

Characterization of the effect of normal load on the discontinuity morphology in direct shear specimens using X-ray micro-CT

B.S.A. Tatone · G. Grasselli 31

A photogrammetry-based method to measure total and local volume changes of unsaturated soils during triaxial testing

X. Zhang · L. Li · G. Chen · R. Lytton 55

Flow liquefaction instability prediction using finite elements

T. Mohammadnejad · J.E. Andrade 83

Simulating granular column collapse using the Material Point Method

C.M. Mast · P. Arduino · P. Mackenzie-Helnwein · G.R. Miller 101

DEM simulations of shear modulus and damping ratio of sand with emphasis on the effects of particle number, particle shape, and aging

L. Tong · Y.H. Wang 117

Small- and large-strain behaviour of a cement-treated soil during various loading histories and testing conditions

A. Taheri · F. Tatsuoka 131

Feasibility of a *soft* biological improvement of natural soils used in compacted linear earth construction

L. Morales · E. Romero · C. Jommi · E. Garzón · A. Giménez 157

SHORT COMMUNICATION

One-dimensional test problems for dynamic consolidation

J.P. Carter · H. Sabetamal · M. Nazem · S.W. Sloan 173
