

Soils and Foundations

Volume 54, Issue 6

CONTENTS

Quality control of double fluid jet grouting below groundwater table: Case history <i>J.C. Ni and W.-C. Cheng</i>	1039
Displacements of column-supported embankments over soft clay after widening considering soil consolidation and column layout: Numerical analysis <i>W. El Kamash and J. Han</i>	1054
Prediction of plane strain undrained diffuse instability and strain localization with non-coaxial plasticity <i>X. Lu, M. Huang and J. Qian</i>	1070
Shear banding in torsion shear tests on cross-anisotropic deposits of fine Nevada sand <i>P.V. Lade, E. Van Dyck and N.M. Rodriguez</i>	1081
Cyclic resistance of two unsaturated silty sands against soil liquefaction <i>Y. Tsukamoto, S. Kawabe, J. Matsumoto and S. Hagiwara</i>	1094
A piezocone dissipation test interpretation method for hydraulic conductivity of soft clays <i>Y. Ansari, R. Merifield and D. Sheng</i>	1104
The effects of block shape on the seismic behavior of dry-stone masonry retaining walls: A numerical investigation by discrete element modeling <i>Y. Fukumoto, J. Yoshida, H. Sakaguchi and A. Murakami</i>	1117
Practical slip circle method of slices for calculation of bearing capacity factors <i>T. Tsuchida and A.M.R.G. Athapaththu</i>	1127
Pullout resistance of granular anchors in clay for undrained condition <i>B.C. O'Kelly, R.B.J. Brinkgreve and V. Sivakumar</i>	1145
Calibration of model uncertainties in base heave stability for wide excavations in clay <i>S.-H. Wu, C.-Y. Ou and J. Ching</i>	1159
Failure behavior and mechanism of slopes reinforced using soil nail wall under various loading conditions <i>G. Zhang, J. Cao and L. Wang</i>	1175
A bounding surface plasticity model for highly crushable granular materials <i>M.E. Kan and H.A. Taiebat</i>	1188
Natural frequencies for flexural and torsional vibrations of beams on Pasternak foundation <i>J.K. Lee, S. Jeong and J. Lee</i>	1202

Continued from previous page

Modeling of uniformly loaded circular raft resting on stone column-improved ground

A.K. Das and K. Deb

1212

Modeling water-NAPL-air three-phase capillary behavior in soils

K. Nakamura and M. Kikumoto

1225

Effect of cation exchange capacity of soil on stabilized soil strength

H. Yu, X. Huang, J. Ning, B. Zhu and Y. Cheng

1236

An approach for quick estimation of maximum height of capillary rise

Q. Liu, N. Yasufuku, J. Miao and J. Ren

1241
